

## Post-Treatment Expectations

- Hair loss should be evident within 10 to 14 days after treatment.
- You may experience a mild, sunburn-like sensation for a few hours, accompanied by redness and/or swelling. To minimize these effects, please use a cold compress. You may also apply a thin layer of 1% hydrocortisone cream or ointment following the cold compress. If the pain persists, please contact our office.
- Please apply medical grade SPF 30 to any treatment areas that may be exposed to the sun.
- Wear protective clothing and do not expose treated areas to the sun for prolonged periods for at least seven days after your treatment.
- Gently wash treated areas twice per day with mild soap and warm water.
- If you must remove hair between treatments, please shave or use clippers only.

**If you have any questions, please call us.**
